### Fairfield sandbag stations ready

**Fairfield, California (Thursday, December 17, 2015)**—Local meteorologists are forecasting a string of northern California storms beginning Friday evening and extending through the following weekend.

Beginning immediately, city of Fairfield residents and business owners can pick up sandbags from 7 a.m. to 4 p.m., Monday through Thursday at Fairfield's Public Works Corporation Yard, 420 Gregory Street. There is a 10-bag limit per Fairfield resident.

Sand will also be available at two other locations: Corner of Pittman and Cordelia roads and the southeast corner of Allan Witt Park off Woolner Avenue. Bring your own shovels; these sand bagging locations are “self-serve.”

Sandbags should be filled only half full. Smaller bags pack tighter and are easier to handle, thus avoiding back injuries. Overfilled bags are unstable when stacked and can leave gaps that allow water to flow through.

If water is pooling around a storm drain inlet and beginning to cause localized flooding, provided conditions are safe, residents may rake away leaves and debris from around drain inlets to allow free water flow. While Public Works maintenance crews do respond to calls for assistance, during heavy rains, they may not be able to get to each storm drain as quickly as desired.

Here are some safety tips if rains persist and residents or business owners are impacted by localized flooding:

- Stay informed of weather conditions in your area.

- Avoid unnecessary trips during stormy weather and advise others of your destination.
- Avoid areas that are subject to sudden flooding.
- Make sure to keep children and pets away from creeks, flood waters, and storm drains.
- If on foot, do not attempt to walk through flood waters or flowing streams. Instead, turn around and go directly to higher ground. Even water as low as six inches deep may cause you to be swept away by strong currents.
- If in a car, drive away from flooded areas. Never try to take a shortcut through them. If your car stalls, immediately abandon it and climb to higher ground.
- Do not “sightsee” in flooded areas.
- Do not try to enter areas blocked off by local authorities.
- If flooding is likely, and time permits, move valuable household possessions to the upper floors of your home or to safe ground.
- If emergency conditions arise, tune to local radio or television stations for emergency information and instructions from local authorities.
- If advised by local authorities to leave your home, move to a safe area before access is cut off by flood waters.
- Have emergency supplies on hand to last for at least three days. Food, bottled water, first aid supplies, medicines, and a battery-operated radio should be ready to go. Have extra batteries on hand.
- In flood-prone areas, keep sandbags, plastic sheeting, and other emergency building materials on hand for waterproofing.

To report localized flooding, please contact the Public Works Operations Division Monday through Thursday, 7:30 a.m. to 5 p.m. at (707) 428-7407. Due to the holidays, the Operations Division is closed every Friday for the balance of 2015. For all after-hours calls, please contact the Police Department at (707) 428-7300.
